## **Personal Statement**

My ambition has led me to emigrate to Vancouver from the United Kingdom, so that I can experience new opportunities and develop myself further.

I recently completed a degree in Computer Games Programming at the University of Gloucestershire, where I acquired skills such as coding in both C# and C++. I am also confident with using source control to manage a project, using Bitbucket and SourceTree heavily. I have knowledge of multiple game engines, such as Unity, Unreal and Cry Engine.

During my time at university, I also undertook the roles of social secretary and club captain of the tennis team. During this time, I was required to be a figurehead for the whole club, ensuring we had a successful year both on and off the court. Communicating with the Student's Union and relaying information to all of those involved in the club helped to achieve this goal. Organisation was also a big factor, and the combination of these led me to being nominated for Club Captain of the Year at the end of year sports awards.

I am hard working and well motivated, which allows me to pick up new skills quickly. I enjoy working within a team, I am flexible, willing to learn and will be committed to the role whilst in employment.

I am a keen sportsman and have played a variety of sports throughout my life. I have played football for over twenty years, which has taught me the importance of teamwork and communication.
